In the face-to-face exit interview the state was very positive about providers and coordinators, implementation of RBI, and screening procedures. They did ask us to look more closely at CAPTA referrals or any medical reports as evals instead of screens, to update some forms, and the statement at the end of our narratives. We will receive a final written report and then the PRT will complete an action plan for each area highlighted.

The Family Survey will be discussed more at our next PRT. PRT will watch: Supporting Children By Improving Family Outcomes. The team that attended DEC Conference will lead the discussion on how to improve our Family Survey results and how it impacts our child outcomes.

- **Gaps and Barriers**
